

Dualflex - AQ

Superior's Dualflex-AQ process inks have excellent adhesion to paper, board and many films. Developed to provide the highest performance in trouble free printing. **Dualflex-AQ** was designed for excellent print density, printing characteristics, and use on high line aniloxes for superb process printing.

Superior's Dualflex-AQ blending inks provide a superior balance of colors and performance using the latest technology. Developed to provide exceptional printability, reliability in batch to batch consistency, and the strength to create the graphics needed for the demanding marketplace. Providing excellent PH characteristics and easy clean-up.

Dualflex-AQ is designed to offer maximum versatility for a wide variety of substrate, press speeds, and color strength. Available in Lightfast inks and Pantone colors. All printing applications should be fully evaluated prior to press application. For more information, please consult your Superior Printing Ink technical representative. Made in the U.S.A.

Anilox Recommendations

Process: 700-1200 lpi
Line: 360-800 lpi

Specs

Viscosity*: 400-1200 cps
pH Range: 8.4 - 9.2

*Brookfield 25C

Recommendations

Use with Doctor Blades
Inks are pumpable / non-foaming

Compatibility: Overprintable, easy clean up, pressroom friendly. Recommend testing before using.
