

Royal Golds & Metallic Silver

Superior manufactures a full array of high performance, sheetfed metallic gold and silver inks with excellent press stability, exceptional brilliance, and outstanding rub resistance. Our highly advanced technical lab has created metallic inks with greatly enhanced characteristics. The Superior advantages of our metallic inks include:

-  Flootation is minimized for improved resistance to finger marking.
-  Great brilliance.
-  Excellent print and trapping characteristics.
-  Outstanding run-ability and a wide operating window for all press configurations.
-  Reliable drying on a wide range of coated papers and boards.
-  These products are also available for heatset web.
